Education

The University of North Carolina at Charlotte | *August 2026*

- Bachelor's of Science in Data Science

Certifications

- **IBM Data Analyst Professional Certificate** | *November 2024*
 - **Lean Six Sigma Yellow Belt** | *July 2025*
-

Experience

Data Analyst Intern at Deriva Energy | *June 2026 - August 2026*

- Automated sensor data quality validation using PySpark and SQL in Databricks, saving \$56,000 annually through reduced manual review time.
- Developed Databricks dashboards to monitor data quality checks and identify sensor data errors for stakeholders.
- Implemented a medallion architecture framework to enhance data quality, governance, and downstream analytics.

Supply Chain Analyst Intern at ABB | *May 2025 - August 2025*

- Streamlined analytics workflows using Power BI, Python, and Excel to enhance decision making speeds.
- Automated reporting with Python and Power BI to improve consistency and free stakeholder capacity.
- Developed a Python Selenium scraper integrated with GitHub Actions for automated price tracking.

Data Analyst Intern at 3D Systems | *May 2024 - August 2024*

- Developed machine learning models using Python to predict inventory to minimize waste.
- Integrated and analyzed 10,000+ Oracle and Salesforce data points with SQL & Excel to enable better decisions.
- Developed dashboards in Power BI, Einstein Analytics, and Salesforce to support C-level decisionmaking.

App Developer Lab Facilitator at Central Piedmont Community College | *August 2024 – Present*

- Guided students in troubleshooting Python, SQL, SAS, Excel, Java, GitHub, and Data Structures.
 - Supported App Development and Data Analytics students in completing assignments & course work.
-

Projects

[ALPR Robustness Analysis](#) | **Capstone**

- Developed a license plate holder to prevent Automatic License Plate Readers from reading a license plate using Adversarial noise.

[Gym Analytics Dashboard](#) | **Personal**

- Built an automated fitness analytics dashboard using Python, GitHub Actions, and JavaScript to ETL Google Sheets data and visualize workout trends with custom SVG charts.
-

Skills

Python, PySpark, SQL, Pandas, Selenium, Power BI, Excel, Lean Six Sigma, Databricks, SalesForce, Git.
